EXPERIENCE

LYFT

Data Intelligence in 21st Century Transportation
Software Engineering Intern | May - August 2018

Data Tooling and Visualization

NVIDIA

Survey Analytics for Cloud Gaming
Data Platform Intern | January - April 2018

Spearheaded new admin controls and dashboards in survey analytics for GeForce Experience. Coordinated with stakeholders in determining product requirements, designing mockups, and implementing final solutions.

FACEBOOK

Interactive Funnel Analysis for Social Networking
Data Engineering, Analytics Intern | May - August 2017

Constructed data pipelines and visualizations for funnel analysis of hundreds of millions of user experience logs to measure and monitor engagement. Acquired internal teams as beta users of the proof of concept and integrated the project into future product roadmaps.

UC BERKELEY HAAS SCHOOL OF BUSINESS

Topic Modeling NLP Algorithms in Customer Analytics
Research Assistant | February 2016 - May 2017

Implemented variations of semi-supervised topic modeling algorithms for applications of natural language processing in customer analytics. Performed exploratory analysis with text mining and data visualizations in Python to identify trends in transaction data.

HEALTHPALS

Data Visualizations in Healthcare Technology
Software Engineering Intern | May 2016 - January 2017

Developed several end to end features to support data flow through treatment monitoring application. Designed data visualizations of patients' medical data within web and mobile applications using D3.js.

EDUCATION

UC BERKELEY

Class of 2019

B.S. Electrical Engineering
and Computer Science

SELECTED COURSES

Completed by May 2018

Computer Science
Algorithms
Machine Learning

Electrical Engineering
Information Systems I

Design
Design Methodologies
Visual Communication

SKILLS

LANGUAGES

C
Java
Javascript
Python
SQL

DATA

D3.js
Hive
Presto

DESIGN TOOLS

Adobe Illustrator
Figma
InVision
